

## VOH Zimbabwe Update: Emphasizing Practical Education July 23,2021

Through the new school curriculum, the Zimbabwean government emphasizes the importance of moving from theory to practical learning. Part of this curriculum change also includes changes to exams. Now 30% of the final exam mark is going to come from practical projects. This change helps students who are not academically gifted learn skills that will help them in the future. At VOH Zimbabwe, we are encouraging our students to take up practical subjects combined with academic ones. We see this as an excellent way to prepare children for a self-sufficient future!
