

VOH Zimbabwe Update: Repairing our Walkways March 25th, 2021

The persistent rains that we have been getting recently in Zimbabwe were starting to make the brick walkways a challenge for our children here at VOH Zimbabwe. Due to the rains, they were often staying submerged in water, making them slippery. We are so proud of the children's initiative in taking it upon themselves to repair the walkways and raise them up from the ground. Everyone gave 100%, and they did a fantastic job! This cooperative and responsible behaviour is a great example to everyone who saw their hard work and the finished product!
