

## VOH Zimbabwe Update: Feeding Program During Lockdown February 11, 2021

In the nation of Zimbabwe, we are back in lockdown. Despite this added challenge, we continue ensuring the children in our outreach areas continue to receive the food they so desperately need. This week at our VOH Zimbabwe Star outreach satellite program, we distributed porridge to the children while observing the safety protocols as outlined by the authorities. The smiles and the cheers keep us wanting to do more. We are currently unable to cook for the kids on location; therefore, we are packaging the porridge in 5kg packs, which will feed the child every morning for at least a month. It is always a joy to minister to children this way and to see them continue to thrive even during these challenging times.
