

VOH Zimbabwe Update: Building a Fence February 4, 2021

In Zimbabwe, we are once again in lockdown due to the pandemic. However, despite the challenging times that we currently find ourselves in, the safety of our children remains a top priority. We are taking this opportunity to build a fence around one of our outreach points. With the increasing number of children that we are ministering to at our Brickyard satellite location, we want to ensure they are protected from the growing number of ditches in the area that are created as people dig up the dirt to make bricks for their home. A fence will protect the children and ensure they are safe from any hazards. When schools in Zimbabwe resume, we will be ready to welcome the children back without worrying about their safety.
