

VOH Zimbabwe Update: Donated Computers! September 4th, 2020

This week at VOH Zimbabwe we are celebrating a donation of new computers!

Due to the lockdown, it has become important that we can conduct online lessons for our children. Seeing the challenge of continuing education during the pandemic, one of our long-standing friends has donated nine computers, one for each of our children's homes.

We are so grateful to those who have come through to help us as we find new creative ways to continue to provide education for our children. This donation will go a long way in assisting our children to stay on top of their school work throughout the pandemic and beyond.
